## Rsam Releases its Highly Anticipated V7 GRC Platform

*7th Generation GRC Platform delivers the most intuitive and flexible user experience yet*

**Secaucus, NJ – April 21, 2010:** Rsam, a leading provider of governance, risk, and compliance solutions, today announced the release of the highly anticipated Rsam version 7, incorporating powerful new reporting capabilities while creating the most intuitive and flexible user experience yet.

Rsam V7 sets a new standard for ease of use, ease of management, and ease of implementation amongst GRC solutions. With Rsam v7 end-users have an easy and highly intuitive interface for navigation and to use the system; Rsam administrators can leverage powerful functionality and configure the elements using a drag-and drop interface and dashboard builder.

“Today’s customers are already short-staffed with competing priorities. They don’t have the luxury of allocating multiple resources to implement and manage GRC solutions, yet still need to see quick return on their investments,” explains Vivek Shivananda, CEO of Rsam. “Rsam v7 significantly reduces the time spent implementing, configuring, and managing their GRC tool and related risk & compliance processes.”

“Rsam technology and innovation continues to evolve through our vast implementation experience and Rsam v7 is a product of the direct feedback received from our customers,” said Kevin Day, CTO of Rsam. “Customers can now create their own custom dashboards in a matter of minutes, without having to rely on their technical staff –that’s powerful!”

Rsam’s 7th generation platform automates processes, creates efficiencies, and reduces both time and costs associated with risk and compliance initiatives. Rsam offers modular solutions, out-of-the-box functionality, and rapid deployment across all vertical industries. Customers leverage Rsam to create a central repository of risk and controls, gain enterprise wide visibility, oversight and assurance, and to help monitor compliance.
